**CATEC**  
**AGRO CARE**

## ***Catec MultiEnzym Layer***

Premix for  
laying hens

**Additives:**

Xylanase 1.500.000 EPU  
Phytase 500.000 FTU

**Animal Species:**

laying hens

**Feeding recommendation:**

1kg/ton used in complete feed

**Packaging:**

25kg bags

**Minimum shelf life:**

12 months

## ***Catec MultiEnzym Layer***

Premix with optimal enzyme content for laying hens. High doses of phytase ensure reliable breakdown of phytin phosphorus - ideal for grain-based rations. Xylanase breaks down non-starch polysaccharides and thereby increases the release of nutrients from the feed. Other enzyme activities such as cellulases, beta-glucanases, alpha-amylases and proteases serve to increase

the nutritional value of the ration. The addition of enzymes ensures higher feed efficiency, drier manure and improved hygiene conditions.
