CATEC
AGRO CARE

Catec Phytase 5000

premix for poultry

additives:

6-Phytase (EC 3.1.3.26) 5.000 FTU per g

use for animal types:

Laying hens, broiler chickens, ducks, geese, turkeys

feeding guidance:

Laying hens: 50 g/t compound feed (250 FTU/kg finished feed) other poultry species: 100 g/t compound feed (500 FTU/kg finished feed)

packaging

25kg bags

shelf life:

12 months

Catec Phytase 5000

Premix with the latest generation of 6-phytase in high dosage ensures:

- Reliable breakdown of phytin phosphorus - ideal for grain-based rations
- High thermal stability during pelleting
- High stability during production and storage
- Scientifically proven matrix values for reliable phosphorus optimization in compound feed
