BROILERS CHICKEN

„**CATEC POULTRY START SPECIAL**“ is formulated in granulated form specifically for chicks and provides the birds with highly available nutrients. To avoid disrupting the intestinal flora, a gentle transition (blending) between feed types has proven helpful.

From the 3rd week of life, the birds should be switched to the fattening feed **“CATEC POULTRY FARMING”** in order to ensure the high meat yield and to be able to cope with growth.

KEY DATA ON BROILERFARMING

- Final weight 2.0 - 3.0 kg
- Fattening period 6 - 8 weeks

TURKEYS

„**CATEC Turkey start**“ ensures safe feed intake in the first few weeks.

„**CATEC Turkey start**“ and „**CATEC Turkey remedy**“ are precisely tailored to the nutritional needs of the animals. Shortly before slaughter, the feed is switched to „**CATEC Turkey end**“.

KEY DATA ON TURKEYFARMING

- Final weight 10.3 kg (hen), 20.6 kg (rooster)
- Fattening period 16 - 18 weeks (hen), 21 weeks (rooster)
