CATEC
AGRO CARE

CATELAC plus20

Complementary feed for dairy cattle and calves
from protected fat and sugar

Ingredients:

Energy NEL	21,4 MJ
Energy ME	31 MJ
Crude fat	80,0 %
Crude ash	0,5 %
Sugar	18,5 %

Feeding recommendation:

200 bis 500 g / cow / day
100 -150 g / calf / day

Fatty acid pattern (typical):

< C 14:0, C 14:0	<1,5 %
C 16:0	44 %
C 18:0	54 %
C 20:0; >C 20:0	<0,5 %

Composition:

Vegetable fat (palm), refined, hydrogenated
glucose

CATELAC plus20

- Combination of rumen-protected fat and readily available sugar (dextrose)
- Rumen-protected fat has a direct effect on the cow's metabolism
- Dextrose improves palatability and may increase feed intake
- Improves the energy supply of the dairy cow and the rumen microbes
- Can also be used in calf rearing to exploit growth potential
