CATEC AGRO CARE

Art.Nr.: 5111050

Catec Milk TOP

Supplementary feed for calves

Additives per kg

Vitamin A	500.000 I.E
Vitamin D3	64.000 I.E
Vitamin E	1.500 mg
Vitamin B1	200 mg
Vitamin B2	200 mg
Vitamin B6	200 mg
Vitamin B12	1.000 µg
vitamin C	1.000 mg
Vitamin K	120 mg
Nicotinic acid	890 mg
Pantothenic acid	400 mg
Choline chloride	5.000 mg
Iron org.	2.000 mg
manganese	800 mg
Zinc org.	400 mg
Copper org.	200 mg
Selenium org.	6 mg

Recommendation for use:

With 50 g of "Catec Milk Top" per day
Whole milk or milk replacer provides an optimal supply of essential trace elements and vitamins:
- higher immunity against diseases
- better oxygen supply to the cells
- easier nutrient digestion

through this:

- more vital calves
- low workload and treatment costs
- higher daily weight gain
- higher milk production, especially in the first lactation

Catec Milk TOP

Whole milk enhancer!

Giving iron to newborn piglets has long been practiced in piglet production. The iron injection or the oral administration of appropriate preparations after birth is part of routine care here. However, the need for additional iron supply for newborn calves is decreasing and still is underestimated. Scientific studies show that the supply of iron is very often deficient in calves. Studies by the University of Giessen have shown that over 62% of calves have iron deficiency-related anemia or low blood pressure at birth. There are iron concentrations in the blood. If we compare the vitamin and trace element contents with the current recommendations, latest research results show deficiencies as well. The negative consequences on the health of calves are very diverse. Impaired blood formation leads to an impairment of the immune system of the calves. Iron is active in antibody production and thus in defending against infections it is involved. In addition to a higher susceptibility to illness (fever, diarrhea,...), reduced feed intake, disturbance of well-being as well as smaller increases are consequences of a vitamin and trace element deficiency.

The unique combination of trace elements, vitamins, electrolytes, probiotics and organic acids make CATEC MILK TOP an indispensable part of optimal calf rearing.
